

Sterile Lane OPORD

Patrol Tactical Order for 2 Active Lanes

SITUATION

An Iraqi Army patrol has detained three high value targets in a house vic the Tadamin Mosque. The patrol has requested a hand-off of detainees to U.S. forces IOT allow Iraqi Army patrol to continue with mission. 1st Platoon will move to the link-up site at OBJ SADER IOT take custody of detainees and move them back to the FOB.

MISSION

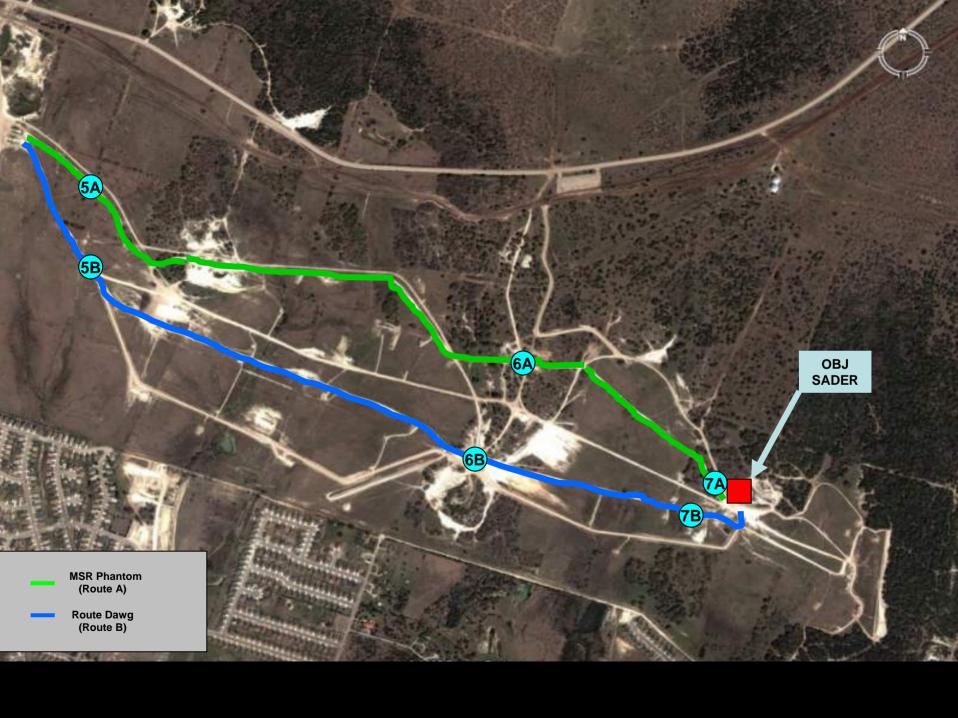

1st Platoon will move to OBJ SADER, secure the three high value targets, and return them to the FOB.

EXECUTION

- •1st Platoon SPs and will ingress to OBJ SADER via MSR Phantom
- •Once on site, 1st Platoon links-up with Iraqi Army POC on the ground, MAJ Tousani
- •Iraqi forces will handover three detainees to U.S. forces
- •1st Platoon immediately returns to the FOB via Route DAWG.

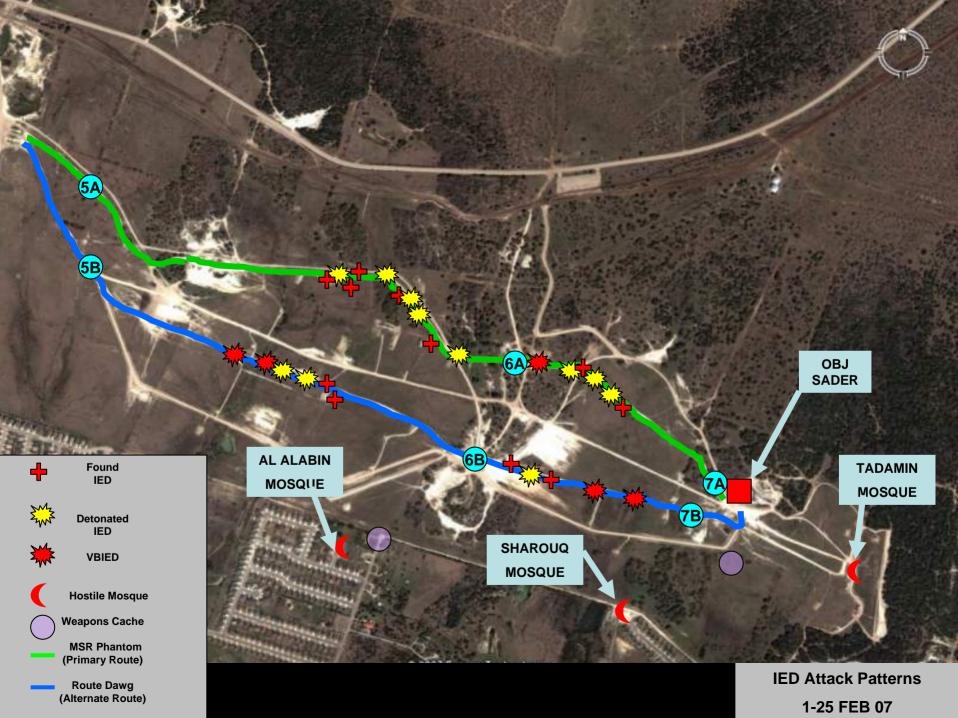

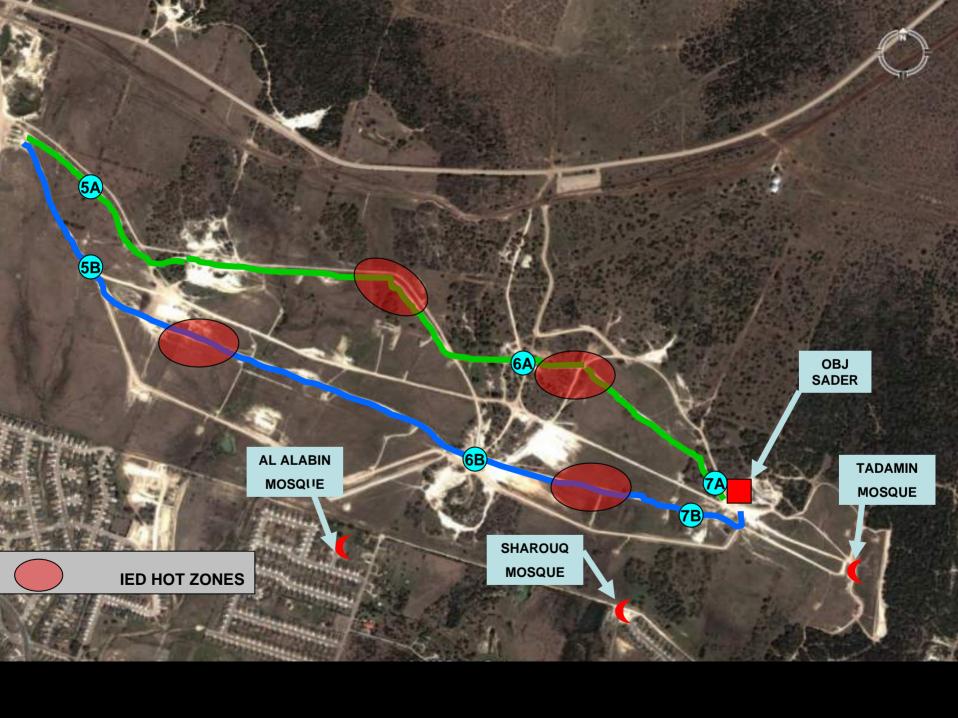

ENEMY SITUATION

Insurgents are targeting CF/ISF patrols and convoys along MSR Phantom (Route A) mainly east of CP 5A and 6A and along Route Dawg (Route B) mainly east of CP 5B and spread out in between CP 6B and 7B. We have also seen an increase in VBIED attacks along Route Dawg. Enemy is using rural roads and canals in the area as avenues of approach onto the routes to emplace IEDs. Enemy is now emplacing IEDs throughout the day as a response to the heavy CF/ISF counter-IED patrols during hours of darkness. IED set-ups usually consist of 1-2 rounds (100mm-152mm rounds) detonated with a pressure wire/switch initiators and washing machine timers used as back-up detonators. We have seen a dramatic increase in coordinated IED attacks using multiple IEDs, small arms fire, and RPGs. This is most likely an intimidation effort as a result of CF activity in the area finding multiple weapons caches and arresting key insurgent figures. If the enemy can successfully detonate an IED on a patrol causing casualties and damage, they may attempt to continue attack on patrol IOT either suppress CF/ISF as the enemy egresses or to maximize casualties and damage. Insurgents are using an advanced warning system to initiate these attacks using cell phones to warn of patrols heading into the area. Enemy could possibly use a "decoy" IED to draw forces in the area where the secondary IED would detonate followed by small arms fire

NAME	TGT NO	ALIASES
Mahim Abouk Hasil	F-1	Abu Omar
Shimam Asaninni Hussein	F-2	Sheik Asaninni
Mabik Mohammad Abhem	F-3	N/A
